

Document Renewal Extractor

Test File Package - Tester Guide

Guide for beta testers and QA

Package version: 1.1

App package ID: app.documentrenewalextractor

Support: designstehev@gmail.com

WHAT IS IN THIS ZIP

This archive is a curated tester package (~25 MB download). It includes the best mix of file types and sizes to exercise import, extract, and export without downloading the full internal QA corpus.

Files are grouped by purpose:

- synthetic/ Small CSV and XLSX with obvious renewal dates. Fast smoke tests.
- realworld/ Government-style spreadsheets (contracts, expirations, HUD data). Covers medium and large spreadsheet preview behavior.
- documents/ PDF contracts and notices from small one-pagers up to one ~12 MB real-world RFP packet for large-PDF stress testing.

Total: 10 test files (3 CSV, 1 XLSX, 6 PDF) plus this guide (TXT + PDF)

Why only 10 files? A smaller zip is easier to download on mobile networks.

These files were chosen to cover every major format and size band the app supports. Internal QA still uses a larger 24-file corpus.

BEFORE YOU START

1. Install Document Renewal Extractor on your Android phone or emulator.
2. Unzip this package on your device or computer.
3. Move the folders somewhere easy to reach:
 - On a phone: Downloads, Google Drive, or Files by Google.
 - On an emulator: drag files into the emulator window or use adb push.

Supported file types:

Free tier: PDF, DOCX, TXT

Pro / Pro Max: PDF, DOCX, TXT, CSV, XLSX

Most files in this package are PDF, CSV, or XLSX. CSV and XLSX require a paid subscription (Pro or Pro Max+) to import and extract.

Plan limits (approximate - see in-app Help for current values):

Free: 1 file per extraction, up to 20 MB per file

Pro: up to 3 files per extraction, up to 30 MB per file

Pro Max+: up to 3 files per extraction, up to 40 MB per file

Files tab library: up to 50 stored imports

HOW THE FILES TAB WORKS

The Files tab is an in-app library. When you import a document, the app keeps its own copy in private storage - not in your Downloads folder.

- Browse Pick files from this device (Downloads, internal storage, etc.)
- Google Drive Pick files from your Google account (Pro formats filtered by tier)
- Clear all Removes app copies only; your originals are untouched

Imported files stay in the app until you tap Clear all or uninstall the app.

STEP-BY-STEP: IMPORT ONE FILE (FILES TAB)

1. Open Document Renewal Extractor.
2. Tap Files in the bottom navigation bar.
3. Tap Browse (blue button).
4. In the system file picker:
 - a. Navigate to where you saved the unzipped test files.
 - b. Open the folder (synthetic, realworld, or documents).
 - c. Tap one file (for example: synthetic/notice-period-deadlines.csv).
 - d. Tap Select, Open, or Done (wording varies by Android version).
5. The file appears in your Files list with its name, size, and source "File picker".
6. Optional - extract from Files:
 - a. Tap Extract Deadlines (yellow button at top).
 - b. Wait for the progress overlay to finish.
 - c. Review results on the Results tab.

Recommended first file: synthetic/notice-period-deadlines.csv (small, fast)
or documents/commercial-lease-renewal-notice.pdf (works on Free tier).

STEP-BY-STEP: IMPORT MANY FILES AT ONCE

1. Open the Files tab and tap Browse.
2. In the file picker, long-press the first file (or tap the multi-select icon).
3. Tap additional files to add them to the selection.

Tip: Select up to 3 files if you are testing a Pro plan extract batch.
4. Tap Open / Select / Done.
5. Each selected file is imported into the Files library (up to the 50-file cap).

To import the whole package into the Files library:

- Import all 10 files in three or four Browse sessions (multi-select helps).
- Or import in batches of 3 (Pro extract limit per run).

To extract multiple files in one run:

1. Import the files on the Files tab (or use Extract tab - see below).
2. Tap Extract Deadlines on the Files tab.
3. The app processes the files in your library according to your plan limits.

STEP-BY-STEP: IMPORT FROM EXTRACT TAB (ALTERNATIVE)

1. Tap Extract in the bottom navigation.
2. Tap the file upload area or Choose files.
3. Pick one or more documents from the system picker.
4. Tap Extract Deadlines.
5. Review results and export if needed.

Use this path when you want a one-off extraction without saving to the Files library first.

STEP-BY-STEP: IMPORT FROM GOOGLE DRIVE

1. Upload the unzipped test folders to Google Drive (computer or phone).
2. In the app, open Files and tap Google Drive.
3. Sign in if prompted and navigate to your test folder.
4. Select one or many files, then confirm.
5. Files appear in the Files list with source "Google Drive".

Note: On the Free tier, the Drive picker only offers PDF, DOCX, and TXT.

RECOMMENDED TEST SCENARIOS

Quick smoke test (2 minutes)

- Import synthetic/notice-period-deadlines.csv
- Extract and export CSV from Results

Free-tier PDF test

- Import documents/commercial-lease-renewal-notice.pdf
- Extract; confirm at least one deadline appears

Large PDF stress test

- Import documents/RFS 318.65-257 F&A TennCare.pdf (~12 MB)
- Extract; expect preview mode on first run (first pages only)
- Extraction may take 10-30 seconds on mid-range devices

Large spreadsheet test

- Import realworld/realworld-hhs-expiring-contracts-fy23-fy26.csv (~5 MB)
- Extract; app uses preview mode (partial data) before full scan

Batch extract (Pro)

- Import commercial-lease-renewal-notice.pdf, law-firm-long-form-master-agreement-test.pdf, and THSA-MSA-Contract-No.-0000001.pdf
- Tap Extract Deadlines once; confirm all three are processed

Files library test

- Import all 10 files in several Browse sessions
- Confirm count shows "10 files (max 50)"
- Use Search files to find "cook" or "hud"
- Tap X on one row to remove a single file

FILE INVENTORY (10 FILES)

SYNTHETIC

notice-period-deadlines.csv Quick CSV smoke test

insurance-policy-renewals.xlsx Quick XLSX smoke test

REALWORLD

realworld-cook-county-procurement-contracts-amendments.csv ~2.1 MB

realworld-hhs-expiring-contracts-fy23-fy26.csv ~5.2 MB

realworld-hud-contracts-rent-utility-allowance.xlsx ~3.8 MB

realworld-hud-mf-assistance-sec8-contracts.xlsx ~4.5 MB

DOCUMENTS (PDF)

commercial-lease-renewal-notice.pdf Small; works on Free tier

law-firm-long-form-master-agreement-test.pdf Contract-style extraction

THSA-MSA-Contract-No.-0000001.pdf ~0.8 MB real agreement

RFS 318.65-257 F&A TennCare.pdf ~12 MB large-PDF stress test

TROUBLESHOOTING

"I only see PDFs" or "CSV/XLSX won't import"

-> CSV and XLSX require Pro or Pro Max+. Upgrade via the Upgrade tab, or test PDFs on the Free tier first.

"File too large" or import rejected

-> Check your plan limit (20 / 30 / 40 MB). The TennCare PDF (~12 MB) fits Pro and Pro Max+ limits. Free tier max is 20 MB per file.

"No deadlines found"

-> The engine looks for contract-style renewal, notice, and payment dates. Some real-world rows may be filtered if they look like meeting or admin dates. Scanned image-only PDFs without selectable text cannot be read (no OCR).

Extraction is slow or app seems frozen

-> Large PDFs and spreadsheets use preview mode first. Wait for the overlay to finish; the TennCare PDF and HHS CSV can take 30+ seconds on emulators.

App closed or crashed during a large PDF

-> More common on low-RAM emulators. Retry on a physical device, or test the small PDFs first. If it repeats, note the file name and device model.

"Unsupported file type"

-> Only PDF, DOCX, TXT, CSV, and XLSX are supported. Rename if the extension is wrong; do not test .xls (old Excel) or .doc files.

Imported file missing from Files list

-> Confirm you tapped Open/Select in the picker (Cancel does nothing).

Pull down or leave and re-open the Files tab. Check you are under the 50-file library limit.

Clear all removed my test library

-> Expected. Re-import from this zip via Browse.

Google Drive picker shows no CSV/XLSX

-> You are likely on the Free tier. Use Browse for local copies, or upgrade.

Export or share failed

-> Try a different target app in the Android share sheet. Ensure storage permission is granted if your OS version requires it.

Wrong or duplicate dates in results

-> Note the file name and snippet text in your report. Some real-world documents contain many date-like fields; not every date is a renewal deadline.

REPORTING ISSUES

When filing a bug, please include:

- Device model and Android version (or emulator image)
- App version (About screen)
- Subscription tier (Free / Pro / Pro Max+)
- Exact file name from this package
- Steps you followed (Files vs Extract, one vs many files)
- What you expected vs what happened
- Screenshot or screen recording if possible
